

# School Highlights

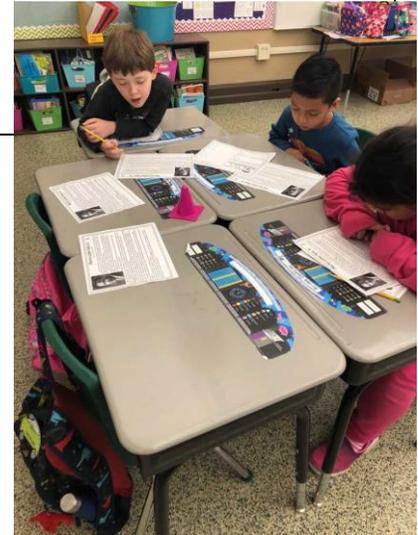

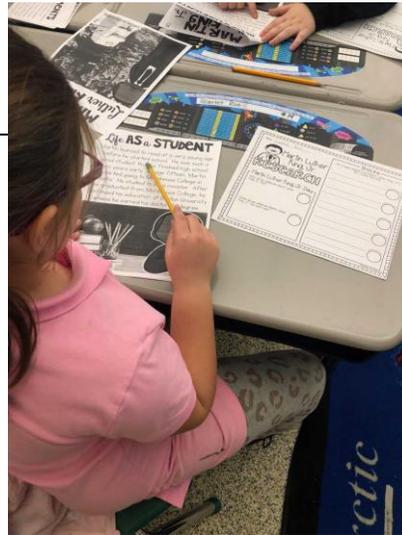

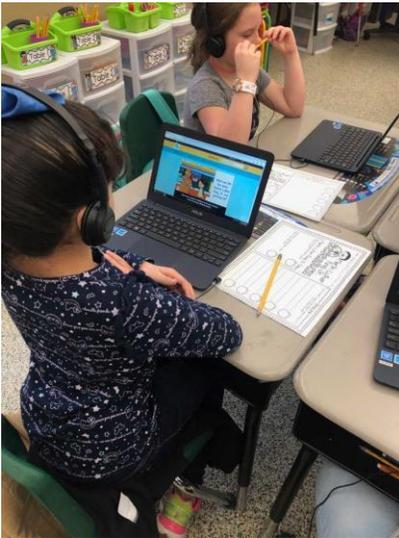

For

January 2019

## School

*Research Project: Dr. Martin Luther King, Jr.*

*To introduce research to our 2<sup>nd</sup> grade classes and begin preparing for our Famous American's Wax Museum, we are researching Dr. Martin Luther King, Jr. as a group. We have created KWL charts, discussed meaning behind his big words, sorted key events and irrelevant information about him, and created a timeline of his life. We will use the resources we created and MyOn.com to create a writing about his life. We will discuss the importance of citing your sources and record where we found our most interesting facts. We hope this will benefit our classes as they begin researching their own famous American.*

*Email to Andrea Byerly by 25<sup>th</sup> of each month.*

## Teacher

*Mr. Hardy- Reading and Math Interventionist*

*We would like to highlight our interveticionist Mr. Hardy. We chose Mr. Hardy for the tremendous help he leading our grade level when Ms. Sprouse was on leave. He showed great classroom management, planning, and kindness to her class. We are so thankful for him! Here is a little about him:*

*“I grew up in Cleveland Tennessee, and I graduated from Lee University in December 2012. I have worked at Arnold for almost four years as a reading and math interventionist. I enjoy reading, drawing and tracking storms when I am not working. If I wasn't in the field of education, I think I would be a storm chaser. I have a wonderful pet Chinchilla named Hedwig.”*

## Student

*Jireh Medina-Resendiz*

*Jireh is a 2nd grade student that all 2nd grade teachers agreed should be highlighted. Jireh is an outstanding student. She is a hard worker and has persevered academically, especially in Math. Jireh started the year in the 22<sup>nd</sup> percentile in math and was placed in a addition Do The Math group. She is now in the 38<sup>th</sup> percentile and showing great understanding in her classroom work. We are so proud of how hard Jireh has worked to become more fluent and gain a better understanding in math. She is also a great friend to all students. She is kind, helpful, and he always tries to please and make the best decisions. Jireh is the type of student that all teachers wish they could have as part of their classroom.*
