

Highlights

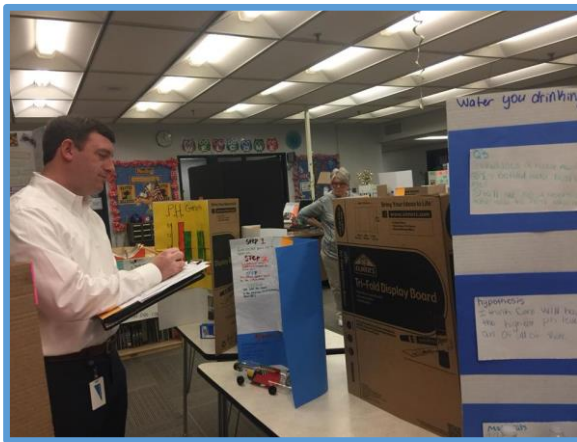

March 2018

Science Fair

The Ross Science Fair was a huge success! Around 70 projects were submitted, and judges from the community anonymously scored the projects using a rigorous rubric.

We are very proud of our budding scientists and their work!

Launching Leaders Field Trip

Ross Launching Leaders and their coaches visited Amazon to learn about leaders in the community and those working within their very successful business!

These students are learning important leadership skills and how to apply those both at school and in their community.
