

Student Learning Teams

PLAN - Prepare to teach students essential standards. Work with colleagues to analyze standards, utilize a viable curriculum, and implement research-based instructional strategies.

TEACH and COLLABORATE – Provide rigorous lessons for students and utilize time to collaborate with colleagues on delivery of instruction.

ASSESS - Throughout the instruction process, use evidence from student work to determine progress toward mastery of standards. This can come in the form of quick formative assessments, common assessments, and summative assessments.

ANALYZE DATA – SLTs find time to routinely analyze data to assess student progress toward mastery.

INTERVENE – SLTs and teachers address students’ identified needs by providing opportunities for intervention and/or enrichment.
